

aroSteward

arodek's Master Data Management & Governance

Unify | Govern | Empower
Master Your Data with Confidence

Harness the Power of Trusted Data

In today's digital economy, data is the fuel that drives intelligent decision-making, efficient operations, and personalized customer experiences. But with growing volumes of inconsistent, duplicate, and siloed data across applications and departments, businesses face increasing complexity.

aroSteward, arodek's intelligent Master Data Management (MDM) & Governance solution, empowers organizations to clean, consolidate, and control critical data—turning chaos into clarity.

Why Choose aroSteward

- Single Source of Truth – Centralize master data across systems to improve reliability and transparency
- Data Governance Simplified – Align with internal policies and compliance mandates through automated stewardship
- Smarter Decision-Making – Give your teams access to trusted, real-time data across departments
- Operational Excellence – Eliminate errors and duplication, speeding up core business processes
- Customer 360° View – Deliver better experiences with complete, clean, and connected customer data

Feature Highlights

Data Discovery & Profiling

Reveal hidden patterns, outliers, and integrity issues in master data.

Data Cleansing & Standardization

Use automation to remove duplicates and enrich incomplete records.

Data Governance & Stewardship

Enable role-based access, approval workflows, and audit trails.

Seamless Integration

Connect easily with SAP, ERP, CRM, and legacy systems via APIs.

Advanced Analytics & Reporting

Track data lineage, performance KPIs, and generate dashboards on-demand.

Driven by ICR capabilities

After extracting data via ICR from documents like PAN, Aadhaar, GSTIN (India) or SSN, EIN, Driver's License (US), the system auto-verifies it in real time with official government databases via APIs or authorized services.

Industries We Empower

Manufacturing

Standardize materials and supplier data to enhance production efficiency.

Retail & E-Commerce

Unify product catalogues across channels for consistent pricing.

Pharma & Life Sciences

Manage clinical and research data for regulatory compliance.

Energy & Utilities

Consolidate asset data for better maintenance and lifecycle management.

Healthcare

Maintain accurate patient records for better treatment coordination.

Financial Services

Improve fraud detection and compliance with standardized customer data.

Logistics & Supply Chain

Synchronize global shipment and inventory data.

Government

Create unified citizen profiles across agencies to improve service delivery.

Quantifiable Business Impact

90% Reduction in Duplicate Records

Ensuring clean, reliable data for all departments.

60% Faster Data Onboarding

Accelerating integration for new systems and processes.

80% Increase in Customer Data Accuracy

Driving higher personalization and satisfaction.

40% Boost in Operational Efficiency

Freeing up time and resources for strategic growth.

25% Savings in IT & Business Operations

Minimizing overhead while maximizing ROI.

What Makes **aroSteward** Different

Industry-Focused Customization

Tailored to the data complexities of your specific industry.

Future-Ready Architecture

Scale seamlessly as your business grows.

24/7 Support

Our global team ensures your success, around the clock.

Rapid Deployment

Get up and running with minimal disruption.

AI Driven Smart Data Matching & Deduplication

Machine learning algorithms to intelligently detect and merge duplicate or similar records across customer, vendor, or product data.

Start Building a Data-Driven Future

Master Data isn't just a backend concern—it's a business enabler. With aroSteward, gain the confidence to innovate, comply, and compete—faster and smarter.
